- Adobe Creative suite
(Specialised in Photoshop,
Illustrator and After Effects)
- Substance Suite
- Zbrush
- Motion Graphics Design and
Animation
- Video Editing

LANGUAGES

- English (Fluent)

PROFILE

I am an experienced 3D artist and game developer, focused on environments and world building. I have written full art pipelines for multiple productions and aided teams in both planning and execution of projects. Along with this I enjoy the creation of worlds, assets and set dressing. I have done my fair share of texturing, lighting, VFX and post process implementation along the way, with 9 years experience aiding teams and providing support across the development process. In addition I have worked as a designer on multiple productions and am always interested in learning new skills and expanding my knowledge of the process.

My background prior to games was in 2D design/Animation and video editing. I am able to create UI and marketing materials for productions easily if needed.

WORK EXPERIENCE

No Brakes Games

JUNE 2021 - JULY 2024
