Game Developer with 4+ years of professional experience specializing in Unity and C# development. Proficient in creating gameplay and UI features, optimizing performance, and integrating backend solutions. Proven ability to work within multidisciplinary teams and adapt quickly to complex development environments.

Experience

3 Little Berkana | GAME DEVELOPER | Jan 2023 - Jul 2024

- Prototyped and implemented 2 minigames for a renowned Danish video games company using their proprietary framework.
- Documented and streamlined work processes for a new development area, facilitating team collaboration and improving efficiency.
- Developed gameplay and UI features, ensuring seamless functionality across iOS and Android platform.
- Managed version control with Git and SVN for an effecient collaborative development.
- Conducted code refactoring and performance optimization to enhance player experience.

Projects I've been part of:

-Makeover Match: <https://bit.ly/MakeovevMatch>

Axios Games Studios | GAME DEVELOPER | Oct 2020 - Dec 2022

- Developed liveops features using Playfab to significantly enhance players retention.
- Integrated SDKs, including ironSource, Tenjin, and GameAnalytics, improving analytics and monetization capabilities.
- Collaborated with international clients and teams to deliver tailored solutions for long-term projects.
- Maintained and refactored codebases, ensuring scalability and maintainability.

Projects I've been part of:

-Rummy Tales: <https://bit.ly/RummyTales>

-Dawnblade: <https://bit.ly/DawnBlade>

Mobillers | GAME DEVELOPER | Mar 2020 - Sep 2020

- Developed a payment system integrating external APIs, streamlining player transactions.
- Worked closely with the backend team to define and implement custom APIs aligned with project needs.
- Implemented player registration and management features using Firebase.

Skills

Programming Languages

C#, C++

Development Practices

OOP, SOLID, Clean Code, Design Patterns

Game Engines

Unity, Unreal Engine (Basic)

Version Control

Git, SVN, GitHub, GitLab

Agile Methodologies

Scrum, Kanban

Backend

Azure Playfab, Firebase

Education

Advanced Technical Degree in Video Games Development* | Image Campus | 2016 - 2019

Technical Degree in Electronics | E.E.S.T. N° 3 San Isidro 15 de Septiembre | 2009 - 2015

**Diploma Equivalent to a Bachelor's Degree*

Personal Projects

Stop The Invasion: Destroy The Tentacles!

- Successfully led development efforts within a multidisciplinary team for this PC and Android 2D pixel art top-down shooter arcade game, programming and designing all aspects of it, supervising visual and audio asset creations and making sure the Android port was done accurately.

-Game on Itch.io: <https://bit.ly/STlitchio>

Other Projects and Practices

- During my learning journey I have developed different types of projects, such as my own game engine developed in OpenGL, recreation of well-known games, AI practices using a finite state machine and pathfinding techniques, practices in Unreal Engine to learn how to use it, among others. These projects can be found on my GitHub profile.
