Dynamic Lighting Artist with a passion for blending creativity and psychology, always eager to explore the relationship between visual art and human perception. I bring a sense of humor and a collaborative spirit to every project, ensuring a positive, ego-free environment. With a keen interest in Gestalt theory, I aim to create harmonious, meaningful visuals that tell a compelling story, much like the way life's events come together to form a beautiful picture. Always open to learning and growth, I thrive on constructive feedback.

PROFESSIONAL EXPERIENCE

3D Lighting Artist at Geotech BV (2022 - 2024)

- Designed a comprehensive lighting workflow to ensure the project was fully optimized for lighting within Unreal Engine
- Worked closely with the art and technical teams to ensure that all textures adhered to PBR (Physically Based Rendering) standards, guaranteeing that materials responded to lighting in a realistic and consistent way across the virtual environment
- Successfully managed the Proof of Concept (POC) for a highly confidential environment, ensuring that all aspects of the project were developed with a focus on discretion, quality, and alignment with the project's goals. Throughout the POC development, I maintained clear communication and documented every stage of the project meticulously, ensuring that only authorized personnel had access to critical information

3D Environment Artist at Chance6 (2021 - 2021)

- Planning of the block-out also involving collaboration on the level design to ensure an engaging and intuitive player experience
- Analyzing the spatial relationships between the game environment and the movement dynamics of the heroes, ensuring that the layout supported the intended flow and pacing of gameplay
- Ensured that the game's environment remained modular, optimizing assets and layout for performance across a wide range of mobile devices
