

Bruno Vescovi Arquillo
Software Engineer

Language	Level (1-5)
----------	----------------

Objective-c/Swift	5
js/ts	5
React	5
Elixir	5
HTML/CSS	5
Java/Kotlin	4
SQL/PSQL	4
AWS	4
c++/c#	3
python	3
Ruby	3

Langs	Level
Spanish	Native
Catalán	Native
English	Fluent
French	Medium

Interests

OpenSource, circular economy, GamingFreeThePlanet, ballance, travel, circus, highline, climbing, sailing, music, permaculture

As a proactive and efficient Software Engineer, I am driven by a passion for new challenges and a love for learning new technologies. With 9+ years of experience in web and mobile development and services integration, I bring a wealth of knowledge to the table. I am committed to producing elegant and perfect code, and I have a strong focus on SOLID principles and code abstraction, stability, and reuse. As a team player with a passion for teaching and learning, I strive to work in a flexible and balanced environment where I can continue to grow and improve as a professional.

Qualifications

Degree in Computer Engineering by **Universidad de Barcelona** (2011-2016)
One year in **Universidad de la República de Uruguay** (2015-2016)
Six months in **Universidad Católica de Uruguay** (2015)
Genexus Analyst By Genexus(2015)

Professional Experience

Mobile Engineer, OrangeLoops (Montevideo/Remote, 2015-2020)

- Broad experience from Objective-C to Swift.
- Continued learning by working in the Android (java and kotlin) side of the apps
- Worked as senior engineer team lead for the iOS team

Full-Stack Engineer, OrangeLoops (Remote, 2020-2023)

- Technical leader of typescript back and front using mostly React, GraphQL and PostgreSQL, building features end to end.
- Developed and maintained robust and scalable applications while following best software development practices

Senior Software Engineer, Doofinder (Remote, 2024- Today)

- Take on memory issues performances on the server
- Take on full development of app integration with the shopware platform, using cloud app system, with iframes and webhooks for stores integrations

Challenges

- Web Application for Snowflake (2015-2016):
Developed a web application for the collaboration tool "Snowflake" as part of a team of 12 advanced computer engineering students. Collaborated as Architect, Development Coordinator, and QA Analyst, and continued the development until the release of Kezmo.

Contact

bruno.vescovi00@gmail.com

- Python Recommender for Snowflake (2016):
Developed a python recommender with ML tools as part of a thesis project in collaboration with UB UDELAR. Conducted research and benchmarking.
- The Level Up (2018-2020):
Contributed to the customization of hundreds of WL apps for restoration, as well as contributing to the development of new features for the SDK. Analyzed the code of all the WL apps for common customizations and updated the SDK.
- SINAI (2020-2021):
Worked as a Full Stack Engineer on a huge js/ts project, contributing to both the front-end and back-end, with highly customized accounting logic for specific carbon emission models. Used postgres databases to create components and business logic.
- DooFinder Shopware App (2024):
Developed single handed, just after the elixir crash course, an app serving html to be shown in the platform through an iframe. The purpose of this app being, installing or migrating stores and configure some features. Then develop the indexation using the api and update on save using webhooks
