

MOKSHA SHAH

An Aspiring Animator

London, UK | +447466009848 | mokshah1204@gmail.com | [Showreel](#) | [LinkedIn](#)

SKILLS

Technical

Maya: Keyframe Animation, Facial Animation, Lip Sync, 3D Modeling, Python Scripting, Rigging
Unreal Engine: State Machines, Animation Blueprints, Keyframe Animation, Sequencer
Blender: 3D Modeling, Keyframe Animation
ZBrush: Character Sculpting, Modeling
Substance Painter: Texturing
Procreate: Digital art, Storyboarding, Portrait art
Illustrator: Illustrations, Vector art, graphic design
Premiere Pro: Video editing, sound editing
Adobe Audition: Sound design, foley design
Nuke: Compositing, Post production
Adobe Photoshop: Graphic design, Matte painting, Photo editing

Non Technical

Communication: Able to share ideas clearly, work well with teams and clients and receive feedback to improve projects.
Adaptability: Open to learning new tools, adjusting to different animation styles, and responding to creative direction.
Teamwork: Ability to work and thrive in a collaborative environment to bring complex concepts to life.
Problem Solving: Good at fixing animation issues, improving workflows, and finding creative solutions to production challenges.

EDUCATION

LIMIT BREAK MENTORSHIP PROGRAM

2024

Remote, United Kingdom

- A comprehensive 7-month, one-on-one mentorship program guided by an experienced industry professional.
- Developed storyboard, studied references and applied body mechanics to create realistic and dynamic animations.
- Experience with keyframe animation in Maya and implementing Maya animations into *Unreal Engine*.
- Researching and learning about state machines, animation blueprints for animation transitions in Unreal Engine.
- Learned about keyframe animation, different event graph nodes, particle effects and sound effects in UE5.
- Taking the animations to the level of game readiness.
- Development and refining of showreel.

MASTER OF ARTS, COMPUTER ANIMATION

2023

Kingston University - London, United Kingdom

- Experience with 3D Modeling, UV Mapping, keyframe animation in Autodesk Maya.
- Learned about 12 principles of animation, animation workflow and basics of rigging.
- Worked in Zbrush for Character sculpting and Substance Painter for texturing.
- *Collaborations* with UI/UX Designers and Programmers.
- Worked as a 3D Artist for development of an AR Prototype for rewilding of Tolworth Farm.
- Compositing proficiency using *Nuke* for post production.

GRAPHICS, WEB AND 2D ANIMATION

2020

Certificate, MAAC Institute - Ahmedabad, India

- Skills development in Graphic and Web designing.
- Knowledge development in *Adobe Suite* and *CorelDRAW*.
- Practical applications of *Logo Design*, *Graphic Creation* and various other design techniques.
- Gaining hands on experience for brand creation and marketing.

BACHELOR OF ENGINEERING, COMPUTER SCIENCE

2020

Silver Oak University - Ahmedabad, India

- Computer coding languages like C, C++, JAVA and Python.
- Gained knowledge and developed skills on various other object-oriented programming concepts, computer graphics and Calculus.

EXPERIENCE

GRAPHIC DESIGNER AND DIGITAL ILLUSTRATION ARTIST

2022

Freelance

- Merchandise designing and commissioned digital illustrations like portraits and fantasy world illustrations.
- Created illustrations in various styles, from realistic to cartoonish, adapting to each project's unique needs.
- Used a range of techniques, from sketching to final rendering, to ensure the style and vision were brought to life accurately.
- Marketing and customer service assistance through event designing and pamphlet designing.

FITNESS 2020

2020

Intern

- Product branding and conceptualisation.
- Designing posters for various corporate events.
- Logo, Pamphlet and business card designing.
- Workflow optimisation and administrative support.
- Tracked and worked towards daily KPIs, consistently meeting targets and ensuring progress on key goals.

PROJECTS

DISSERTATION – THE TALK

- Created a 23-second character animation as part of dissertation project, emphasising advanced animation techniques.
- Developed story board, researched references and also acted out part of the reference for the shot.
- Focused on *lip sync*, *facial expressions*, and *body mechanics* to demonstrate animation principles.
- Applied diverse constraints to highlight adaptability and proficiency in animation methods.

TOLWORTH REWILDING

- Created 3D assets for an AR app prototype focused on rewilding London's Tolworth Farm, collaborating with Game Designers, Developers, and UI/UX specialists to align with project goals.
- Designed 2D illustrations utilised for subsequent 2D animation within the app.
