MOHAMMAD TAHA

3D Artist | Animator

Profile

Experienced 3D Artist with over 9 years of expertise in 3D modeling, texturing, rigging, and animation, with a strong understanding of game, film, and commercial production pipelines. At Funovus, rigged and animated over 80 characters across six games, some exceeding 5 million downloads on Google Play. Currently serving as Lead 3D Animator / Technical Animator at DarkEmerald studio, where I create animations for characters, interactive props and NPCs, then implemented these animations into Unity's animation controller. This involved designing a complex state machine with over 50 animations for the main character, ensuring smooth transitions and a responsive gameplay experience. I also develop Python scripts to create animation tools, enhancing efficiency and automation in the animation pipeline.

Work Experience

2023
-
2025

Dark Emerald Gaming Studio

Lead 3D Animator / Technical Animator

- Working closely with programmers and game designers
- Creating animations and game cinematics for our upcoming game Enci's solution
