3D Films -3D Artist June 2001- December 2003

A great first opportunity to begin my career within the industry working for a company that specialises in creative design and character based 2D and 3D animations for television, film and games. Within this role I utilised my knowledge of Softimage and 3D Max primarily.

Key Achievements

Within two months of joining this company, I was promoted to the team handling the most important project in the company. This was not only due to my knowledge of Softimage but also my focus and determination in getting the job done. This often involved working very long hours and on occasion throughout the night.

Projects:

Apocalyptica (3d Studio Max, Premiere, PhotoShop, PC, X-box video game) PUBLISHED on the 24-October-2003

Level modelling:

- Five levels, from start to finish
- Responsible for Light mapping and exporting levels
- Modelling
- Textures
- Multi pass textures
- FX.
- Lighting
- Visibility and collision meshes
- Environment animation
- Character modelling:
- Character modelling
- Textures
- Character animation
- Animation: -Character and environment animation.
- Animations for videos in the game, intro and outro
- Editing movies
- Sound and sound FX, music and facial animation key framing
- The Wheels on the Bus (Softimage XSI, TV animation)**
- Character and environment animation
- Lip syncing
- Lighting
- Character and environment modelling
- Editing

Freelancer February 2001- June 2001

Whilst actively looking for my first role within the 3D animation industry, I completed some freelance work for two clients, Shepherd Day Associates and the St Lucia Connection. This work mainly comprised of designing wireframes and I also completed an architectural based project.

Training - Media Arts production June 2000 - January 2001

Media Arts Production Facilities are a computer graphics and animation training company.

The focus of this seven-month course was to learn 3D Studio Max 3-4, Photoshop 5.5-6, Premiere 5.1, and character Studio 2-3. A completed project in the form of a show reel primarily using Max was expected at the end. A gruelling full-time course, but extremely valuable.
