Professional Profile

Senior Unity Developer with over 10 years of experience in game development, including technical leadership and cross-functional expertise across various platforms. I have worked both in game studios and as an independent developer. My greatest passions lie in AI programming and procedural generation. I'm a highly organized programmer, used to agile methodologies, comfortable working with legacy code, and committed to efficiency and best practices throughout the project lifecycle and the team workflow.

Technical Skills

Languages & Engines: Unity, C#, C++, cocos2d-x, ActionScript, Java, Python, .Net

Systems: Gameplay, AI (FSM, Pathfinding, Behaviour Trees...), physics, procedural generation, UI

Networking: Netcode, Mirror, ad-hoc messaging, server communication, sync and interpolation, third-party SDK integration (ads, analytics...)

Architecture: System design, data modeling, Unity Editor tools, profiling

Tools: Visual Studio, MonoDevelop, Git, SVN, Jira, Confluence, Jenkins, Blender, GIMP, Inkscape

Professional Experience

Nexxyo Labs

Pamplona

Lead developer

Feb 2023 – Jan 2025

- Led the architecture and technical development of Blocks & Goblins and Racerloop in Unity.
- Deployed Racerloop to the Epic Games Store and delivered subsequent updates through a CI/CD pipeline.
- Supervised junior programmers, reviewed code, and assigned technical tasks.
- Implemented online multiplayer modes with physics and game logic synchronization.
- Designed AI systems, physics, gameplay mechanics and automated tests.
- Coordinated cross-departmental development using agile methodologies.

Independent Developer

Jerez de la Frontera

Game developer

Nov 2016 – Dec 2021

- Fully developed Multirun, a procedural platformer game in Unity, including publication on Google Play.
- Designed and implemented a procedural puzzle game with 3D world generation and first-person perspective.

Pyro Studios

Madrid

Game developer

Mar 2010 – May 2015

- Developed three social network games (TV Studio Boss, Fitness City & Paradise Club) and two smartphone games (Link a Word & Evolution Planet, also released on Steam).
- Participated in all stages of development, from prototyping to final release.

Notable Projects

- **Racerloop** – Competitive multiplayer racing game developed at Nexxyo Labs. Release on Epic Games Store.
- **Multirun** – Procedural platformer game developed solo in Unity for Google Play.
- **Evolution Planet** – Strategic puzzle game published on Steam and mobile. Developed at Pyro Studios.
- **Procedural Puzzle Project** – Technical experiment featuring 3D procedural world generation, first-person mechanics, and puzzle systems enhanced with machine learning techniques.
- **Social Games** – Tycoon games for social networks developed at Pyro Studios: Paradise Club, Fitness City & TV Studio Boss. Release on Facebook and the Spanish platform Tuenti, where they became top performing titles.
