OBJECTIVE: Provide technical leadership, development, and mentorship to drive innovation and workflow efficiency. Focus on delivering high-quality results quickly by leveraging technical expertise and maximizing resources for optimal outcomes.

MAJOR QUALIFICATIONS

- Over 20 years of technical experience covering a diverse range of skills
- Saved thousands of man-hours by designing efficient systems through strategic planning and a clear understanding of requirements
- Proven leadership in technical direction, planning, design, pipeline development, coordination, and training across multiple disciplines
- Specialist in asset pipelines and tools development
- Highly creative, innovative, and resourceful
- Strong communicator, able to collaborate effectively with teams across production, software development, IT, and even non-technical areas like finance and administration
- Committed to fostering a productive, enjoyable work culture
- Very dedicated to all projects and people involved while establishing functional and fun work culture
- Experience with managing and working with teams across multiple timezones (US, EU and Asia)
- Passionate tech enthusiast

TECHNICAL EXPERIENCE

Programming Languages: Python, C#, Javascript, C++, LUA

Game Engines: Unity, Unreal, RedEngine & Various internally developed game engines

Databases: SQL(MSSQL, MySQL), noSQL (DynamoDB, MongoDB) and GraphQL

Technical Art: Rigging, Tools, Automation, Full Asset Production Pipelines, Physics Simulation, Motion Capture, VFX, Some shader programming

Art Skills: Characters, Rigging, Animation, VFX, Post-Production

Game Technology: Gameplay programming, Physics, Tools, Rapid Prototyping, 3D Mathematics

Cloud Technology: AWS Lambda, DynamoDB, RDS, EC2, Lightsail, S3, Amplify

Frameworks: Flask and FastAPI

Electronics: Firmware programming, Drones, Wireless, Sensors

Content Creation: Maya, 3DS Max, Motion Builder, Houdini, ZBrush, Substance, Photoshop, AfterEffects

Workflows and Collaboration: Jira, Bitbucket, Git, Perforce, Slack

Documentation: MS Office, Confluence, draw.io

Market Data: Bloomberg, Factset, Barchart and Binance

Legacy Technologies: MEL, XNA, Actionscript, DirectX

ROLES AND ACHIEVEMENTS

Seedify: Lead Technical Artist (November 2024 – Present)

- Establish technical standards on art production for both internal and external sources
- Direct balance and give feedback between technical and art requirements
- Lead Technical Art, VFX, Shaders and Lighting teams
- Strategic planning for asset creation
- Training artists with faster, more efficient workflows and techniques
- Coordinate with developers for improving current systems and establishing new ones
- Coordinate with external companies for technical requirements for integration into the Seedworld game
- Assets cleanup and optimization
- Shader development and optimization

Metagora: Quantitative Analyst / Senior Software Developer / Co-founder (February 2019 – Present)

- Managed a finance tech startup handling hedge fund and private investor trading accounts
- Established a Philippines branch for trade monitoring, execution, and software development
- Directed systems planning, risk assessment, and operations
- Acted as the primary technical and business crisis manager
- Analyzed market data and portfolio performance, overseeing trading and software development
- Collaborated with external services, managing hiring, mentorship, and staff training
- Oversaw trading operations, software development, and hiring processes
- Evaluated and collaborated with external services
- Built a remote-first, value-driven company culture focused on teamwork, excellence, and personal growth across the US, EU and Asia

Elite Management and Consultancy: Head of Development / Communications Officer (August 2019 – June 2022)

- Managed software and systems development for primary investor's payroll company
- Migrated on-site systems to cloud infrastructure (pre-pandemic)
- Led hiring and evaluation of software developers
- Streamlined communication with payroll staff and revitalized company culture
- Overhaul payment systems to a centralized bank payroll payment system
- Scaled operations to support 5+ payroll companies
- Collaborated with external service providers

People Can Fly: Senior Technical Artist (June 2017 – August 2019)

- Provided technical art direction and mentorship
- Developed an asset tracking system for debugging build issues
- Designed and optimized asset production pipelines
- Led tools and automation systems for asset creation and integration
- Created character, vehicle and prop rigs, cinematic animations, real-time VFX, and environments
- Contributed to the Outriders project

CD Projekt Red: Senior Technical Artist (January 2016 – June 2017)

- Establish city assets generation and optimization / streaming

- Led the migration of workflows from 3DS Max to Maya-based pipelines
- Developed asset tracking, browsing tools (Python, C#), and databases (MSSQL)
- Standardized data-driven asset creation for consistency
- Defined naming conventions and structures for all asset teams
- Managed outsourcing and asset distribution pipelines
- Built asset browsers for environment teams and parametric Houdini batchers for distribution scripts
- Integrated Maya tools and scripts
- Contributed to The Witcher 3 Expansions and Cyberpunk 2077

SuperMassiveGames: Tools and Pipeline Technical Artist (October 2012 – July 2015)

- Led R&D for art tools and next-gen VFX
- Managed art production, workflows, and VFX for prototypes
- Specialized in creature rigging, including most complex dinosaur rigs for *Walking with Dinosaurs*
- Developed facial rigging systems
- Created an asset pipeline with metadata for mobile teams using Unity 3D and Maya
- Provided rigging training for animators and managed environment asset tools

Eurocom Developments Ltd: Tools & Pipeline Technical Director (October 2008 – October 2012)

- Analyzed, designed, and proposed tools, techniques, and workflows to boost productivity of Art and Development Teams in multiple simultaneous projects
- Coordinated with art and programming teams to deliver optimal solutions.
- Attended cross-disciplinary meetings to ensure efficiency and collaboration among Games, Animation, Rigging, Facial, and Motion Capture teams.
- Identified bottlenecks and provided solutions, developing technical innovations for art and game teams.
- Created a Nuke Script generator to automate image layer previews and sequence renders.
- Developed ConMan (Conversion Manager), an automated video conversion tool for all major consoles, saving 1,600 man-hours on one project.
- Designed COP (Capture On Playback) software for automating image sequence capture from PS3 for cutscenes.
- Pioneered a new technique for capturing finger motion for a confidential project.
- Credits include Ice Age 3, GForce, Dead Space: Extraction, and GoldenEye 007 (Wii).
- Maintained a game project for testing art assets on core engine libraries, resolving art-related issues.
- Handled cutscene animation export, setup, cleanup, and import into in-game formats.
- Provided pipeline support during critical milestones.

Lady Luck Digital: Game Programmer / Asset Pipelines Technical Artist (February 2008 – October 2008)

- Led R&D on programming languages, tools, and asset pipelines
- Rigged and animated title screens for Lost Cases of Sherlock Holmes
- Developed reusable Flash AS3 particle systems for flash-based games
- Managed asset pipeline and texturing for an unannounced golf game
- Integrated GUI assets for an unannounced Wii fitness game
- Conducted R&D on Unreal Engine 3 for in-game cinematics and technology
- Served as a technical consultant for complex 3D tasks

3Lbs Studios: Technical Director / VFX Lead - CG Supervisor (March 2006 – December 2007)

- Oversee CG production from pre-production to completion
 - Communicate with clients and manage artist workload based on skill and deadlines
 - Screen applicants and train full-time and freelance artists
 - Provide technical and some art direction
 - Set up production pipeline and IT systems to enhance efficiency
 - Create scripted tools and program using MEL scripting to reduce redundancy
 - Design and implement visual effects, including dynamics and compositing
 - Handle character rigging and create low-level animation expressions
 - Ensure assets meet technical compliance and fix client-provided VFX
 - Document production rules and technical specifications
- Assist with technical issues and suggest optimizations

CreativesAsia: Technical 3D Artist / Real-time 3D Programmer (Oct 2004 – Dec 2005)

- Project lead for real-time 3D Production. Ex. Singapore Military Simulation for STTS
- Developed Pipeline for Real-time 3D related Projects
- Developed proprietary tools and applications to enhance efficiency and productivity by minimizing redundant tasks
- Handled technical specifications for most pre-rendered projects and all real-time projects
- Designed online collaboration tool for Philippine and Singapore offices
- Developed Real-Time 3D Simulation or Visualization Software for demonstration purposes
- Served as Company Representative for Strategic Planning Conference for the Philippine Animation Council

LSK Dynamic Management Corporation: Creative Designs Team Leader / IT Manager (January 2004 – September 2004)

- Led a small team of 3D Artists to produce 30-second commercial for FIVB international volleyball tournament (Manila Leg) and other visual media
- Manage IT-related issues such as networks and workstations

JVM and Associates Lawyers – IT Technician/CG Artist/Intern (2000-2003)

- Manage IT-related issues such as networks and workstations
- Family-owned business

FREELANCE WORK:

Anino Entertainment: (Guest Instructor)

- Instructed artists on the technical aspects of asset production
- Educated developers on optimization techniques to enhance performance

Digital Dodge: (VFX Artist)

- Created the **Tsunami Sequence** and **Spaceship Fleet Intro Sequence** for the final episode of "Lastikman," a fantasy-superhero TV series aired on ABS-CBN

Secret Six: (Freelance Real-time Character Rigger)

- Conducted **research and development** for an in-game character rigging system using **3DS Max**

Eyecontact Studios: (Technical Consultant)

- Engaged in **research and development** for proposed medical visualization project

Ignite Media: (Freelance VFX / RND Technical Director)

- Served as a VFX artist for entries in the Metro Manila Film Festival, including “Zsa Zsa Zaturmah” and “Mano Po 5”.
- Developed the Floating Blue Ribbon effect for Globe's “Ayt” commercial.
- Performed rigging and animation for the Bio-Fuels Law Advertisement featuring Senator Miguel Zubiri.
- Executed camera tracking and matching, along with rotoscoping and compositing tasks.

Artfarm: (Freelance 3DS Max/Maya Instructor)

- Trained leading traditional 2D animators in the transition to 3D production
- Covered topics including modeling, texturing, lighting, UV layout, skinning, biped/bones rigging, animation, expressions, and the 3D production pipeline for 3DS Max

AWARDS & CERTIFICATIONS

- Certification for having passed the first ever Computer Graphics examination held in the Philippines and sponsored by ITPF and JITSE. (Japanese Standards)
- Guest Lecturer – “3D Computer Graphics and Animation” University of Santo Tomas 2003
- Guest Lecturer – “3D Game Development” University of Santo Tomas 2003
- Guest Lecturer – “3D Game Development Concepts” AMA Computer University 2004
- Candidate for Best Thesis – “OverShadow” AMA Computer University April 2003
- Thesis Documentation Ranks #2 of top 5 for school yr 2002-2003

EDUCATION 2000–2003 AMA Computer University, Quezon City
Bachelor of Science in Computer Science

HOBBIES AND SKILLS

- Rock Climbing
- Compound Archery
- Solo Skydiver (Category 8)
- Electronics
- Model kits
- Derivatives and Crypto Trading
- Effortlessly getting into the weirdest and funniest situations
- Novice Latte Artist
- Combining any of the above with work-related skills
