📁 PROFESSIONAL EXPERIENCE

Gameplay programmer

Sep 2024 – Jan 2025 | Luleå, Sweden

Blamorama games

- Built a C# avatar creator with 600+ assets, giving users wide customization options.
- Created a C# multi-account system with signup, login, profile editing, and local save/load of avatar data.
- Designed a tabbed UI (5 main tabs, sub-tabs) in C#, improving navigation and usability by 20%.

Junior Unity Developer

Feb 2023 – Jul 2023 | India

Canopus Games

- Created a drag-and-drop Scratch-style UI in Unity C# for a kids' game.
- Built a VR airplane endless-runner in Unity C# with smooth flight controls.

Unity Developer Intern

Oct 2022 – Feb 2023 | India

Ravikiran Infotech

- Built a multiplayer VR bicycle racing game in Unity C# with Photon Fusion and Google Cardboard.
- Created a WebGL and Cardboard VR car racing game in Unity using Photon PUN.
- Prototyped a 3rd-person multiplayer shooter in Unity C# with Photon PUN.

🧠 PROGRAMMING KNOWLEDGE

- | | | | |
|-----------------|---------|----------------|-------|
| • C++ | • C# | • Godot | • Git |
| • Unreal engine | • Unity | • Cheat engine | |

📁 PROJECTS

The Ultra Bot - Unreal engine

- Built a modular 3C controller in Unreal Blueprints with object spawning, teleportation, super-speed/jump, and character resizing.
- Created an in-game QA menu in UMG for ability testing, added AMD FSR 3 upscaling (30% FPS gain), and built a clear developer UI.

You cannot reach the end - Unity

- Built a Unity C# physics-based player controller and boosted performance 50% with pooling, culling, shaders, and batching.
- Created enemy AI, developed five levels, and used DoTween for smooth Unity animations.

Mod projects

- Built C++ mods for RDR1, GTA V, Valheim, and Max Payne 3 using memory hooks.
- Created Unity C# mods and reverse-engineered IL2CPP binaries with Ghidra.
- Used x86 assembly and Cheat Engine to develop game trainers.

🎓 EDUCATION

M.A in Game Design

Aug 2023 – Jun 2025 | Visby, Sweden

Uppsala University

- **Relevant courses:** Game Design Studio, Game Prototyping & Testing, and LIA Internship

B.E in Information Technology

Aug 2018 – Aug 2022 | India

Goa College of Engineering

- **Relevant courses:** C++, OOPS, DSA, x86, 3D Math, Vectors, Trigonometry, OS and Memory management.
