

Curriculum Vitae

Personal Profile - 個人プロフィール

25 years old, self-taught, creative, always willing to learn new things, pushing my limits, and experiment with everything I do. I easily adapt to what is proposed to me. I have been making music since 2012 approximately, making genres such as EDM, Synthwave, Trap, Game ST's, and more. I have been making art way before I was a Videogame student, but in those years was when I learnt the most. I have versatility in styles and genres, so every project will be safe with me as an artist ;)
