SUMMARY

3D Character Artist with 5+ years crafting high-fidelity characters and props across PC, console and mobile. Expert in full-pipeline workflows—ZBrush sculpting, retopology, UV unwrapping, PBR texturing, rig setup and real-time animation—for both Unity and Unreal. Proven at remote, cross-functional collaboration, delivering optimized assets on schedule for diverse platforms

WORK EXPERIENCE

Sperasoft, A Keywords Studio 2022 - now

Project: Star Wars: The Old Republic

- Executing complete 3D pipeline: high-poly sculpting in ZBrush → retopology → UV unwrapping → PBR texturing in Substance Painter → rig setup and animation prep
- Designed stylized-realistic human, creature and combat-gear assets with dynamic silhouette and motion-ready topology to support high-impact gameplay animations
- Collaborating remotely with programmers, designers, sound and VFX artists to ensure visual consistency and technical feasibility across co-development projects
- Collaborated with riggers and animators to fine-tune skin weights and animation-ready edge loops

Project: Mortal Kombat

- Designed high-fidelity humanoid and creature bases with rig-friendly topology for lifelike deformations in Unreal Engine
- Executed full asset pipeline—sculpt, retopo, UV unwrapping, map baking and PBR texturing—ensuring consistent style and performance
- Consolidated textures into atlases and configured material instances to minimize runtime draw calls
- Importing models to engine UE4
- Mentored junior artists on topology best practices, PBR workflows and live-service asset delivery

FuryLion 2021 – 2022

Projects: FIFA, The Elder Scrolls

- Creating hairstyle by XGen for footballers, coaches and generics
- Designing different styles characters with detailed armor, fabric drapery and intricate ornamental detailing, guided by world-building and narrative design principles

ADDITIONAL INFORMATION

- **Developing skills in people management**

Mentored a person during a pre-bootcamp phase, completed leadership and soft-skills courses

- **3rd Place, ART Contest 2023**

Awarded by Sperasoft for my personal project.

- **Active Participant in Game Jams**

Regularly participated in game development events, contributing art and design expertise to various projects.

- **ArtStation Contest Participant**

Competed in ArtStation's prestigious art competitions, showcasing my artwork to a global audience.

SKILLS

Organic Modeling • Anatomy & Form Studies • Composition, Color Theory & Lighting • Hard Surface Modeling • Anatomy knowledge • High-poly and Low-poly modeling • Baking • PBR/Non-PBR Texturing • Hair creating • Clothes creating

TOOLS

Zbrush • Maya • 3ds Max • Marvelous Designer • Substance Painter • Marmoset Toolbag • Adobe Photoshop • XGen • Perforce • Unreal Engine 4/5

EDUCATION

THE URAL STATE UNIVERSITY OF
ARCHITECTURE AND ARTS

Bachelor's Degree – Fine Arts, 2020

LANGUAGES

- ENGLISH–B2
