## WORK HISTORY

### MANTRA FILMES

Brazilian studio focused on children's productions with works already published on Amazon Prime, open TV and YouTube.

**Junior 3D Animator** | 01/2024 to 01/2025

#### "Edy"

Feature film that tells the story of an E.T. who lives on a planet where music is prohibited, so he travels to Brazil to live his dream of becoming a musician.

- The entire film was shot with human actors, so I had reference videos in every scene.
- Monitoring and feedback of all scenes produced by a Lead Animator through syncsketch with frame-by-frame analysis.
- Produced scenes and poses for the film's marketing, focusing on conveying the meaning of music in the characters' lives.
- Using Blender I animated Zuzu, Edy, Tiao, Clo and Rony. As part of the project proposal, I gave more emphasis to arcs, appeal and exaggeration and follow through, to create more fluid and cartoonish animations.
- I used tools like Breakdowner, Motion Paths and AnimEasy to help me mainly in more cartoonish scenes.

#### "Pé e Cabeça"/"Foot and Head"

A 10-episode children's cartoon in which two brothers build a robot to help them with their school homework.

- Responsible for reusing scenes from all episodes of the production.
- Participated in the assembly of layouts using the animatic as a reference.
- Followed the character rigging process, doing animation tests and giving feedback.

**3D Animation Intern** | 01/2023 to 01/2024

#### "Portao Mágico"/"Magic Gate"

A 12-episode children's cartoon in which 4 friends live adventures after passing through a magical gate.

- For the main characters and their pets, I tried to focus on squash and stretch, timing and secondary actions. For the villains, I used more solid drawing and staging techniques, with the aim of making the drawing more cheerful and playful for the target audience.
- Participated in the creation of poses and movements for the character library, using the "Studio Library" and "Tween Machine" add-ons in Maya.

## EDUCATION

**MÉLIÈS COLLEGE** | 01/2022 to 12/2023

Best animation school in Latin America, focused on audiovisual productions with international references.

#### Animation Design

- Co-created a short-film that mixes 2D and 3D techniques
- Participated in small projects of different animation styles, such as: Stop-Motion, 2D, 3D, Motion Graphics, etc.
