About Me

Computer Games Development student at the University of Westminster with experience in Unreal Engine 4, C++, and team-based game projects. Passionate about game design, systems programming, and accessibility. Eager to contribute creative and technical skills to the games industry.

EDUCATION

University of Westminster

BSc Honours Computer Games Development

Classification: Predicted 2:1

Relevant Modules: *Game AI, Computer Graphics Programming, Machine Learning & Data Mining, Games Networking and Security*

London, England

2022 - 2025

Murugaon Education Society College of Arts & Commerce

BSc in Computer Application

Relevant Modules: *CMS, Web Technology, Multimedia Technology, Android Programming, DBMS, OOP*

Goa, India

2018 - 2021

PROJECTS

Raven Lament (Coursework)

Unreal Engine 4 | Action-Adventure | Level Design | Programming | 2024

- Developed an open-world action-adventure game set in a fictional country blending Japanese and Spanish influences.
- Served as **Level Designer** and **Programmer**, designing mission flow, combat zones, and environmental storytelling.
- Created dynamic paths allowing players to choose stealth and melee combat styles.
- Focused on player agency and narrative integration in a quest for revenge, truth, and redemption.

Ember's Echo (Game Jam)

Unreal Engine 4 | Game Design | Level Design | itch.io | 2024

- Designed a narrative puzzle adventure for a game jam, featuring moral choice mechanics and companion-based gameplay.
- Played a dual role as **Game Designer** and **Level Designer**, creating an emotional storyline centred around loyalty and sacrifice.
- Built a whimsical yet mysterious forest environment encouraging exploration, puzzle-solving, and moral decision-making.
- Published the game on itch.io, highlighting rapid prototyping and creative teamwork under a deadline.

SKILLS

Software & Tools

- Unreal Engine 4 & 5 (Blueprints, level design), Unity (C# scripting), Direct3D 11
- Visual Studio, Blender, RStudio, Photoshop, Niagara (Unreal VFX), Android Studio, Photon & Steam (Multiplayer)
- Git, Perforce, itch.io, Trello, Notion

Programming Languages

- C++, C#, Java, R, Kotlin, Blueprint (Unreal scripting), HTML, CSS

INTERESTS

Story-driven games (Assassin's Creed, Nier: Automata, Sekiro), level design, gameplay systems, AI in games, world-building, and immersive narrative experiences.
