PROFILE

Dynamic 3D Artist with over three years of experience in creating immersive and engaging visuals for games and advertisements. Expertise in developing high-quality models, textures, and rendering techniques using industry-standard software.

Knowledgeable in game development and programming with a specialization in 3d art. My dual citizenship and residence (Brazil and Germany) allow me to work in both Europe and South America.

WORK EXPERIENCE

Feevale University 2019 - 2020

3D ARTIST - VOLUNTEER

- Responsible for producing 3D models for VR games that aid in physical therapy for children.

Freelance

2021 - 2023

3D ARTIST

- Production of 3d models for advertisements and games.
- Created realistic textures and shaders using industry-standard software such as Substance Painter, and Photoshop.
- Worked closely with clients to understand their vision and needs.

Feb, 2023 - Sep, 2023

IS THIS MIDGARD

Contract 3D ARTIST

- Production of stylized Pokemon like 3D props and creatures for a mobile game.
- Responsible for optimization and integration of assets into game engines (Unity).

2023 - 2024

BIG MOXI GAMES

MID LEVEL 3D CHARACTER ARTIST

- Created realistic and stylized 3D characters and textures.
- Collaborated closely with art directors and project managers to ensure deliverables met artistic vision and technical requirements.
- Responsible for creating a real time hair card workflow

2024

Amber Studios

Freelance 3D Character artist

- Freelance 3D character artist as part of the Amber Studios talent agency.

EDUCATION

2019 - 2022

ASSOCIATE DEGREE IN VIDEO GAME DEVELOPMENT

Feevale University

- I studied game development and programming, with a particular focus on Unity. I helped develop six games during my studies and gathered experience in multiple areas of game development. Later on, I chose to focus and master in 3D art.

SELECTED PROJECTS

WARDENS RISING

- In Wardens Rising, I was responsible for creating both high-poly and low-poly versions of stylized heroes and NPC characters. In addition to texturing and edge flow optimization.

EXOGP

- My role at EXOGP was to create the high-poly models for both male and female characters. I also participated in the texturing process and collaborated with my team to optimize the models.

UNDISCLOSED PROJECT

- I was a part of the early phases of development for an unnamed project for Bix Mox Games. My main responsibility in this game was to create a workflow for the production and placement of hair cards. My responsibility included grooming and creating a few hairstyles.

MONSTER LINEAGE

- I was tasked with creating all 3D assets in Monster Lineage, specifically stylized props and creatures that were designed for mobile devices. I worked with a small team and assisted our 2D artist in designing and producing concepts for the game, and helped with the creation of marketing materials.
