Job Location: Remote/ Ready to relocate/ Currently in Wroclaw, Poland

ABOUT

Environment & prop artist with extensive experience in creating high-quality 3D assets for PC, mobile and web games. My main focus has been on environment work—building props, trim sheets, tiled textures, and setting up scenes in Unity. I've worked closely with concept artists and designers to turn ideas into optimized, game-ready environments. I'm comfortable adapting to different art styles and always aim to deliver high-quality visuals that also perform well in-engine.

PORTFOLIO
