EXPERIENCE

Creatives In The Attic

Jun 2025 - Jul 2025

Freelance Environment Artist

- Working on an unannounced project in a hugely popular mobile game series
- Creating sets of upgradable buildings used for gameplay progression, based on client-provided concepts and references
- Collaborated closely with project managers and other artists to meet production deadlines, milestones and ensuring timely and high-quality asset delivery
- Maintaining consistency in terms of visual style and technical specifications and ensuring assets were optimized for mobile performance constraints, balancing visual fidelity with efficiency

Zenos

Oct 2021 - Oct 2024

Environment Artist

- Working on [Zenos Stadium](#) & other unannounced projects
- Creating and implementing game-ready environment, prop and foliage assets
- Material creation, set dressing, lighting and optimisation
- Collaborating with a cross-functional team to solve creative and design problems in VR
- R&D and bug fixing, problem-solving with artistic solutions to technical problems
- Assisting with the recruitment process of potential new hires and participating in interviews

Psytec Games

Aug 2024 - Oct 2024

Environment Artist (Contract)

- Short-term co-development contract as part of Zenos working with Psytec Games on [Titan Isles](#), a VR co-op adventure game built in Unity
- Creating and implementing game-ready environment, vehicle and prop assets
- Working with the Art Director, Game Director, Concept Artist and other Zenos artists to establish the visual style and quality

Experience Points

Dec 2019 - Present

Editor

- Proof reading, editing articles and content before they are published on the [Experience Points website](#), a hub for games environment art content such as articles and tutorials

University of Northampton

Feb 2024

Guest Speaker

- Invited to do a talk and presentation to the students on their [Games Art course](#) detailing my journey into the industry, my work and experiences, advice for various topics and a Q&A session where I could provide more direct help to students with specific queries

Experience Points Productions

Sep 2020 - May 2021

3D Artist (Contract)

- Creating realistic game-ready props from real-life references for [The Camp Asset Pack which is available on the Epic Marketplace](#)
- High/low poly modelling, unwrapping, baking, texturing and game engine implementation
- Following art direction and providing help and feedback to other team members

V-Real

Apr 2018 - Sep 2021

CGI Artist

- Creating photorealistic [Architectural Visualisations](#) to specific client needs
- Modelling, texturing, lighting, rendering and post-production
- Managing and prioritising multiple projects to meet strict deadlines while liaising with clients

The Void / Continuum Attractions

Nov 2017 - Apr 2018

VR Technician

- Maintaining the technical side of The Void's [Star Wars: Secrets of the Empire](#) hyper-reality experience in London
- Stage calibration, motion tracking, fixing custom hardware
- Managing networks/servers, preventing technical issues
