Career Summary

Through my career, I have worked for various companies and created 3D characters and environments for games such as PC, mobile, and casual.

I have knowledge and understanding of artistic principles, composition, sculpting, and knowledge in different pipelines: Nanite (Unreal Engine), large props for the environment with masks and tilling textures, baking textures, working with texture atlases etc.

One of my biggest achievements was leading a team of trainee artists at Gats. I was responsible for managing resources, training the team, and creating pipelines which allowed me to achieve high results and complete projects on time.

My current place is an outsource company where I create photoreal as well as stylized assets for big studios and companies. Already finished a couple of projects, and looking for the next opportunities to develop myself as an artist.

Professional Experience

Volmi - A Virtuos Studio	01.2024 - till now	3D artist environment artist
Gats , Ukraine	10.2021 - 01.2024	3D artist stylized props for games
