Ambitious and technically adept video game developer currently pursuing a BSc in Video Game Design and Development at Universitat Jaume I. My main focus is programming, although I have a certain inclination towards Tech-Art. I am highly motivated, eager to learn, and thrive in team environments. I am known for my ability to meet deadlines with determination and for consistently delivering high-quality work.

PROFESSIONAL EXPERIENCE

Although I have no prior formal work experience, I have developed a diverse and robust portfolio of games spanning various genres and platforms, including PC and mobile. Notable projects include:

- [Tears & Luck at The Devil's Casino](#) – my first GameJam (48h), winner of the Spooky Game competition at UJI, October 2023.
- [Clumsy Mimics](#) – developed for my second 48h GameJam.
- [Tricky Mansion](#) – my first game published on the Play Store, also created during a 48h GameJam.
- [Hereadero del Oficio](#) – a 4-month project commissioned by the L'Alcora Town Council as part of a university triple-module initiative. This game was awarded:
 - Best Game – Audience Choice Award, L'Alcora Town Council & UJI (2025).
 - Best Projection Award, L'Alcora Town Council & UJI (2025), awarded by [Michael Santorum](#).
- [Nombre del Juego](#) – developed as part of a web development module, and awarded Best Web Game 2023/24, UJI, July 2024.
