PROFILE

A creative and technical animator with a proven track record of delivering high-quality animation across a range of styles for major IPs including Minecraft Dungeons, Fallout 76, and Disney's Tron: Catalyst. Skilled in both the artistic and engineering sides of animation, from hand-keying character and creature animations, to building rigs, developing tools, and implementing characters into various game engines.

EXPERIENCE

BITHELL GAMES LTD, REMOTE : SENIOR ANIMATOR

October 2022 - present

Tron: Catalyst [Disney, Big Fan Games, Devolver Digital]

- Created hand-keyed gameplay animations for the player and NPCs, with a focus on dynamic, responsive combat.
- Responsible for all character rigging as well as keyframed cutscene animation.
- Worked alongside character artists and designers to establish an animation pipeline from the game's inception, through to the end of the development cycle.

DOUBLE ELEVEN LTD, MIDDLESBROUGH : ANIMATOR

September 2019 - October 2022

Fallout 76 (Nuka-World on Tour) [Bethesda Softworks]

- Created rigs and hand-keyed animation for new creatures, implemented animation state machines.
- Created and extended internal Python rigging tools for Maya, streamlining the animation workflow.
- Independently troubleshooted and composed the animation pipeline, as well as producing workflow documentation to instruct junior animators on the project.

Minecraft: Dungeons (DLC) [Mojang AB, Xbox Game Studios]

- Created character rigs and hand-keyed gameplay animations for players, enemies and bosses across 6 DLC's.
- Developed bespoke animation and rigging tools in Python/MEL, significantly increasing workflow efficiency.
- Onboarding junior animators and mentoring them throughout the project.
