

Byron Griggs MSc (pending)

b.griggs-2022@hull.ac.uk

(+44) 07920230460

<https://github.com/ByronGriggs2/Software-Portfolio>

Personal Profile

A reliable and passionate Computer Games Programming MSc. student with high marks and experience with real world software development looking for an entry level game programming position. Prior projects include performance-oriented designs with DirectX 11 and C++.

Relocation: Open to opportunities in the UK/EU/Canada; visa sponsorship welcome.

Technical Skills

Programming Languages: C, C++, C#, HLSL

Tools and APIs: Azure DevOps, DirectX 11/D3D11, AWS, Parasoft, Visual Studio

Project Management: Version control (git), PRINCE2, Agile

Other: Native English speaker, multithreading, physics simulation, object-oriented design, machine learning, computer architecture

Education

University of Hull

Sept 2025 – Present

MSc Computer Games Programming (Expected: Distinction)

- **C++ Programming and Design (69%)** – Utilised C++ programming guidelines, profiling, and memory management optimisation.
 - Created a 2.5D platformer using Parasoft to improve maintainability (see portfolio).
- **Simulation and Concurrency (75%)** – Learned how to efficiently utilise multithreading to simulate environments with complex physical interactions.
 - Created an in-depth interactable multithreaded physics simulator (see portfolio).
- **Cutting Edge Concepts (72%)** – Wrote a meta-analysis paper on Generative AI in the video game industry with a team of 7.
- **MSc. Dissertation (in progress)** – Created and trained a neural network to play the game Awaria.

University of Nevada, Las Vegas

Aug 2019 – Dec 2023

BSc Computer Engineering (Dean's Honor List in 6 out of 8 terms)

- **Signals and Systems for Computers (A-)**
- **Operating Systems (B+)** – Learned about processes, memory management, and threading.
- **Data Structures and Algorithms (B+)**
- **Cloud Computing in Engineering (A)**
- **Senior design project (A-)** – Created an IoT smart device (see portfolio).

Professional Experience

Commercial Development Practice (September 2024-April 2025)

- Worked with a team of 5 to develop software for the University of Hull
- Utilized principles of Scrum and PRINCE2
- Released iterative deliverables with frequent client feedback and repeated quality testing
- Work held to a high standard of quality
- Leadership experience in rotating roles such as scrum master and project manager
- Gained extensive experience in writing technical documentation

Line Cook at Jason's Deli (Feb 2024-Aug 2024)

- Fast paced environment
- Developed teamwork and communication skills
- Learned to adapt to chaotic work conditions
- Gained experience in customer service

Collections/Assessment Student Assistant (Jan 2023-Dec 2023)

- Worked mainly with Microsoft Excel
- Gained experience working in a corporate structure
- Partially automated my job by writing an excel parsing program
