

RICARDO ALBUQUERQUE

Environment Artist

ricardoalb.artstation.com

ABOUT ME

Environment artist with over 8 years of experience in creating detailed and realistic 3D models for video games with several published.

Passionate for art and games and always looking for a way to push the boundaries of 3D art and consistently staying ahead of industry trends.

My background and experience on different companies has provided me skills which help to overcome situations and deal with diverse challenges so as to create better art and continue growing.

Mar 2020 – Jan 2021

Star Wars - Tales from the Galaxy's Edge
Forza Horizon 5
Call of Duty: Vanguard

3D Artist

Oct 2013 – Feb 2019

3D Vehicle Artist

WRCS

FlatOut 4: Total Insanity
Dakar '18

3D Generalist

Trapped Dead: Lockdown
Demons Age;

Police Simulator: Patrol Duty

3D Generalist

Mar 2012 – Dec 2012

Team from Earth

- Creation of environment assets, some of them destructibles, along side with destroyed versions and respective debries. Assembling and importation in the engine of all the work done.
- Hard surface hero props/vehicles were produced according with the required pipeline, respecting and delivering high quality.

Room8 Studio

- Creation of multiple 3D assets within tight deadlines, passing through all the processes of the pipelines (highpoly, lowpoly, bake, texturing, etc).
- Worked in various projects with different art styles.

31st Union

- Developed modular assets/ buildings to populate the scenarios.
- Worked closely with the Lead artist to ensure the assets and textures looks according with the standards and project vision.
- Import and setup of the finals assets seamlessly into the engine.

elite3d

- Creation of hard surface models for various clients and projects.
- Importation of assets to game engine to verify the quality.

Bigmoon Entertainment

- Creation of multiple vehicles for the different games, with different pipelines according with the needs and relevance.
- In charge of importation and setup of the vehicles in engine along side with the programmers, and helping supervise the vehicles models of my colleagues to check the quality standards.

- Responsible to create content for the videogames in different departments like VFX; materials; lighting; props; environment.
- Along side the programmers, worked on solutions for game optimization.

RTP

- Created a pilot episode of animated TV series for children. In this project we have to create everything from scratch, and the result was an episode of 5 min.
- My responsibility was to create animations, setup the lighting, renders and editing.

EDUCATION

Bachelors Degree

Sep 2008 – Jul 2011

Animation Design and Multimedia

Instituto Politécnico de Portalegre

- I finished my degree in Animation Design and Multimedia in which I was able to learn and develop different skills, such as video and audio capture and editing; photography; graphic design; 2D and 3D animation and all the necessary skills to produce an animation short film from scratch.
