EDUCATION

3D Game Art, BA (Hons)

University of Hertfordshire

PROFICIENCIES

Unity

Unreal Engine 5

Maya

ZBrush

Substance 3D

Marvelous Designer

SKILLS

3D Modelling

Texturing/Shading

Asset Optimisation

Real-Time Lighting

Photogrammetry

Cloth Simulation

Environment Art

Source Control & QA

Mentoring & Leadership

REFERENCES

Available upon request.

ABOUT ME

Lead 3D artist with specialisation in VR and VP, looking for rewarding and challenging creative industry position, with goal of advancing management skills and refining high quality art production processes.

EXPERIENCE

Lead 3D Artist

2023 – Present

MergeXR

Producing 3D assets and environments for virtual production and XR education project to partner and client briefs.

- Led art sub-teams, including task assignment, mentorship, and training, both remotely and across departments.
- Collaborated with large teams across multiple organizations, including partner company i3 Simulations.
- Managed scenes and assets using source control within game engines, ensuring efficient workflows and version control.
- Oversaw art production from block-out to optimization.
- Specialised in environment art, clothing simulation, modeling/sculpting, and high-to-low-poly pipelines.
- Partnered with art directors, concept artists, designers, and clients during creative ideation and pre-production phases.
- Conducted QA to ensure assets met project specifications, providing feedback to maintain high standards and consistency.
- Worked cooperatively with teams and individual artists to deliver high-quality results while maintaining streamlined workflows.
- Integrated industry trends and emerging technologies to enhance pipeline efficiency and quality.

Senior 3D Artist

2013 – 2023

AiSolve

Producing 3D assets and environments for VR entertainment, education, and enterprise products on multiple platforms.

- Designed and optimised 3D assets and environments, ensuring compatibility with hardware specs and performance constraints.
- Created immersive environments by lighting and baking scenes in Unity, balancing visual fidelity with performance requirements.
- Delivered both stylised and photorealistic assets, adapting to project-specific art directions and client needs.
