Profile

Versatile in 3D production for Environment Assets, Characters, Rigging and Animation. Specialised in working with *Agile* teams on projects in all stages of development. Experience managing outsource content, working across disciplines and teaching/ mentoring. Focused on the mobile space, specifically start-ups and new teams looking to develop and establish a solid product.

Core Skills

3D Specialist – Focused on stylised character anatomy and clothing, stylised and realistic texturing and character technical development. Extensive proficiency in industry standard packages:

Maya, ZBrush, Substance Painter/ Designer, Marvellous Designer, Unreal Engine 4, Unity, Photoshop, Re-topology, Anatomy, Drapery, Hard Surface, Scan-Data Cleanup, Blender, Rigging & Animation

Project Aligned – Work with the wider aims and goals of the production team at the forefront of problem solving and decision making. Minor tasks are done with a larger goal in mind while larger art/design problems are solved in a way that defines and establishes a reliable process for the future.

Mentoring and Problem Solving – Optimization of Pipelines and Workflows, coming up with new approaches and solutions through Research and Development. Extensive mentoring of colleagues, outsourcers and students in 3D Processes and Pipelines. Experience in building Art Bibles, Critical Feedback and Art Direction. Presented to shareholders and directors.

Work Experience

3D Artist

Netspeak Games **July 2024 - Sept 2025**

- Authoring static and skeletal assets for production (Props, Environments, Characters)
- Rigging and animating skeletal assets (Machines, Characters, Interactables)
- Working in *Agile* with Jira, Using CMS (Unity Gluon) and Version Control (Git/Sourcetree)
- Working in engine (UE5) to implement, edit and prepare Meshes, Blueprints and Data Tables.
- Creating and editing materials and particles for game and marketing use
- Art reviews, process planning and process iteration
- Authoring marketing materials and resources in still image and video through engine and after effects.

Character Artist

Mesmerise Global **Oct 2022 - April 2023**

- Lead small team on R&D on "Gatherings" VR social app.
- Character art and general 3D production and rigging.
- Collaborative role between specialist engineer and myself.
- Additionally responsible for production of project through Jira.
- Bridged and maintained communication between R&D and wider department.
- Presented to shareholders and founders.

3D Artist

Dreamfuel Games **April 2022 - Aug 2022**

- Produced 3D assets from provided concepts.
- Worked directly with 3D lead and concept artists.
- *Agile* at a very high pace and output.

Lecturer

Anglia Ruskin / Brighton University **Sept 2020 - July 2024**

- Teaching first, second, third and Master years production pipelines, skills and software.
- Supporting Master students create games to briefs set by active game development studios.

3D Artist

Microsoft **March 2019 - July 2019**

- Face scanning and cleanup project handling hundreds of face scans and managing/ training external artists in anatomical cleaning and preparation for face generation algorithms.

Other Projects

- Mentor for Young Giants scheme teaching young people with disabilities creative skills
- Tutor for DV8 Creative College teaching creative A levels to kids from re-engagement and disability schemes

Education

2020-2021

MA Computer Games Development
Anglia Ruskin University, Cambridge
(Distinction)

2015 – 2018

BA (Hons) Computer Games Art
Anglia Ruskin University, Cambridge
(Distinction First Class Honours)

2014 - 2015

UAL Level 4 Diploma in Art and Design (illustration)
Colchester School of Art
(Merit)
