Profile

An enthusiastic Game Software Engineering student at Bournemouth University, with a strong foundation in programming and game engine development. Experienced in collaborative game projects, eager to apply technical skills to a Software Engineer role and contribute to innovative, real-world solutions.

Technical Skills

- | | | | |
|--------------------------------|-----------------|----------|------------|
| • C++ | • Unreal Engine | • GitHub | • Audacity |
| • C# | • Unity | • Python | |
| • Bilingual (English, Chinese) | • HTML | • SQL | |

Education

BSc (Hons) Game Software Engineering

Bournemouth University • 2023 - Present

Recent grade: 72%

- 3D Graphics Programming - 77%
- Mathematics for Computer Graphics - 77%
- AI Game Programming - 76%
- Physics for Games - 71%
- Programming for Interaction - 71%

A-levels • Mathematics - A • Physics - A

IGCSE • Mathematics • Additional Mathematics • Physics • Chemistry - (all) A*

Relevant Experiences

Software Developer • 12 / 2 0 2 4

I independently developed a multi-client TCP client-server chat application with a user-friendly FLTK GUI, enabling real-time messaging between multiple clients.

Responsible for:

- Designing and implementing the server-client architecture using C++ sockets
- Building a responsive GUI with FLTK for user interaction
- Implementing error handling and data validation to enhance robustness

Through this project, I deepened my knowledge of network programming (Winsock2, TCP/IP), GUI development, and C++ fundamentals while successfully creating a reliable communication tool.

Specialist Programmer • 01 - 05/2025

I served as the specialist programmer, responsible for developing core gameplay mechanics in a 9-person team project centered on a hunting simulation Unity game with a relaxing, light, and story-driven gameplay experience.

Responsible for:

- Developing AI NPC movement, weapon system, time system
- Collaborating regularly with teammates to adjust mechanics based on feedback and ensure consistency across all gameplay systems.
- Debugging and optimize codes for clarity and performance

This teamwork experience greatly developed my collaborative skills and taught me how to use GitHub especially for version control, in team-based game development.

Other Experiences

Huang Shang Huang (food company)

Sales Assistant (part-time job) • 04 - 06/2023

Responsible for:

- Providing customer service
- Managing transactions, operating on machine to set and adjust price scale
- Keeping track of inventory, organizing goods in the store

This job has given me the opportunity to interact with clients from different backgrounds and enhanced my ability to handle urgent situations effectively.

Animation Dubbing Club

Founder/Leader • 02/2022 - 06/2022

Responsible for:

- Organizing meetings to assign roles to each team member
- Supervising team members' daily practice sessions
- Coordinating a performance for a large school festival
- Reporting to student union about tasks in club

These duties deeply developed my organizational and leadership skills.

Hobbies And Interests

I enjoy following the latest trends in the stock market and have a strong curiosity about quantitative trading strategies. This interest motivated me to deepen my knowledge of Python, focusing on libraries like NumPy and Pandas for data analysis. Throughout this process, I have also gained a foundational understanding of finance and mathematics.
