Professional Experience

Freelance, 3D Artist - Props & Environment

03/2025 – Present

Assisted and worked with studios like Orbifold Studios, Immersion etc. Creating props, set-dressing assets and environments including high-resolution sculpting, baking and texture creation.

Remote

Gamecan OÜ, 3D Artist

11/2023 – 01/2025

- Worked on hard surface models, textures, environments in accordance with the art direction and production deadlines. Setting up the shaders, character rigs inside Unreal Engine.
- Investigated legacy assets to identify optimization opportunities and refined mesh topology for better performance.
- Leveraged Confluence, Slack & Perforce (version control) to manage feedback loops and maintain project momentum across time zones.

Parnu, Estonia |

Remote

Concrete, 3D Visualization Artist

10/2020 – 09/2023

- Modeled and textured VR optimized assets for immersive web experiences.
- Authored, optimized and validated over 100 sourced assets from online marketplaces, ensuring consistent UVs and Texel density across the entire asset library.

Chennai, India

Projects

Contenders: Arena, PvP Arena Shooter

Created Melee Weapons, Projectiles & Dongsles for Gladiators. Collaborated with a major outsourcing studio to convert high-poly Mech Gladiators into game-ready models, gained insights into mech anatomy and optimized UVs for a shared shader setup in Unreal. See Project Materials:

- [Melee Weapon - Gut Knife](#)
- [Macmillan Armor](#)
- [Dongles & Bots](#) | [Final livery design](#) [Courtesy of Tatauna]

Half-Life 2 RTX, Survival, Community-made mod

Collaborated with Orbifold Studios to overhaul Half-Life 2's visual fidelity by producing enhanced high-poly replacements to improve realism and surface detail, while maintaining the silhouette integrity of the original models.

Oh, Hel No!, Roguelite Survival

Designed [terrain textures](#) for Overworld and Hel, including grass, flower decals, sand, snow, and stone paths using Substance Designer. Created optimized environment shaders in Unreal Engine to support dynamic lighting and material blending.

Project Wellspring (Delayed, TBC), Survival Horror

Worked on stylized realism characters and props for an unannounced AA title. Take a look at the prototype and the some of the character models [here](#) .

Web-Twin Pro

Worked closely with **Immersienn** to create web-optimized virtual 3D Worlds providing an immersive experience and a cost-efficient alternative to traditional marketing. Check out the [final product](#) & [scene presentation](#) for more information.

Education

Vellore Institute of Technology,
M.S Software Engineering (Integrated Course)
GPA: 8.22 / 10

07/2013 – 04/2018
Vellore, India

Skillset

Software Skills

- **Modeling** : Maya, Blender, 3Ds Max, Zbrush
- **CAD** : Plasticity
- **Texturing** : Substance 3D Suite, Photoshop
- **UV** : RizomUV
- **Baking** : Marmoset Toolbag, xNormal
- **Retopology** : Topogun, Retopoflow
- **Cloth Production** : Marvelous Designer
- **Visualization** : Keyshot
- **Shader & Asset Setup** : Unreal Engine

Core Skills

- Props & Environment Modeling
- Organic & Hard Surface Modeling
- Retopology
- UV Mapping
- Texture Baking
- PBR & Handpaint Texturing
- 3D Visualization
- UE Shaders

Goals & Recognitions

Jr. Tech Artist

Preparing to transition into a Junior Technical Artist role in the near future, leveraging transferable skills from a Software Engineering background to unlock scalable asset creation and pipeline development.

Work Featured On

Teamed up with The Billboards Collective to create an accurate 3D representation of Chaigaadi. Work featured in 2 major design journals: [DesignBoom](#) | [Yanko Design](#)

Other Certifications

- Industrial Radiography Testing & Safety Level-1 | BARC

Languages

English | Tamil | Telugu | Hindi
