PERSONAL PROFILE

An experienced programmer with a drive for delivering performant and efficient solutions to problems across all aspects of application development in the creative/video game industry. Worked on dynamic projects with variable team sizes and resources available, resulting in an adaptable approach to work while maintaining a high standard of delivery and development of strong communication skills whether working with a team or independently.

Focused on Unity3D Engine and surrounding development environment, including C# and C++ programming languages and a wide range of supporting tools in 2D/3D graphics development, and application deployment.

Always on the lookout for latest developments and releases, keen on widening the skillset and integrating new knowledge in challenging environments.

KEY SKILLS

- Flexible approach to work, used to Agile and Waterfall development environments
- Familiar with Object Oriented and Data Oriented programming approaches
- Competent with C#, Visual Scripting and C++. Used to working with CG, GLSL and graph-based solutions for graphics programming.
- Excellent knowledge of Unity3D engine across most features and revisions.
- Proficient in use of Visual Studio and Rider Integrated Development Environments (IDEs), familiar with Adobe Photoshop, Blender and 3DS Max 2D/3D graphics suites.
- Used to working with Git/GitLab, Perforce and SVN for Source Control

EMPLOYMENT HISTORY

October 2023 - Present: FitXR Ltd.

Senior Unity Engineer

- Development and maintenance of internal content production tooling, including efficiency and productivity improvements.
- Fully rewritten gameplay playback system to enable development of new content and improved extensibility for future feature development.
- Adapted FitXR app to OpenXR standard and rewired the application to simplify multi-platform development and maintenance.
- Ported FitXR to an Unreleased XR Platform.

December 2015 – October 2023: vTime Ltd

Software Developer (Dec 2015 - Nov 22), Senior Software Developer (Nov 2022 - Oct 23)

- Development of technology behind and rendering of Avatar systems for vTime XR and vTag
- Developed key tools for asset import, processing, optimisation and animation of characters for Border Bots VR.
- Involved in development of abstraction layers for a variety of Virtual Reality (VR) and Augmented Reality (AR) platforms, including device simulation inside Unity3D Engine.
- Profiling and Optimisation of applications, using off-the-shelf and custom developed tools in Unity3D Engine. Iterating on projects throughout the development lifecycle to ensure best practices from all departments are kept up and performance targets met.

- Creation of custom tooling for developers and other creative departments to speed up project iteration.
- Deployed applications to multiple platforms including Windows, Android, iOS and PS4/PS5 targeting Flat Screen, VR and AR environments.

August 2015 – November 2015: Sonomatic Ltd

Junior Software Engineer

- Development of specialised software for ultrasonic scanning
- Prototyping and iterating on design of tools with engineering department
- Maintenance of code base using Source Control

EDUCATION

Liverpool John Moores University

2012-2015 Computer Games Technology BSc with First Class Honours

Modules: Computer Games Development, Mathematics and Computer Graphics , Multiplayer Online Game Development, Cloud Computing, Computer Games Design and Technology, Object Oriented Software Development

Fazakerley High School

2010-2012 A-Level

- BTEC Level 3 Subsidiary Diploma in IT - Distinction
- BTEC Level 3 Subsidiary Diploma in Creative Media (Games Development) - Distinction*
- A2 Maths (D)

Fazakerley High School

2007-2010 GCSEs:

- English (C)
- Maths (A)
- Biology (A)
- Physics (B)
- Level 2 Higher Diploma in Engineering

ADDITIONAL INFORMATION

Tinkerer by nature, with video games and computers as central focus since a young age. Lured into the industry by modding, hacking and taking various video games apart with help of early internet forums, enjoying that as much as playing them in their new, twisted state. More technical than artistic in nature, excited by developments across most related industries, a Techie at heart. Fan of history, at least some parts of it, but also drawn to fiction with an occasional book in hands. Doesn't stray away from nature, big on cycling, hiking and simple walks with the dog.

Fluent in Polish and English.
