Education

Brunel University, London

2023-2024

MSc | Digital design and Branding

Key modules: Digital Media Technologies, Digital Design, Brand Experience Design, Digital Branding Strategy

Xi'an University of Technology, China

2022-2025

MA | Image Art and Digital Design

Key modules: Frontiers and Technologies in Design Studies, Contemporary Image Art, Advertising planning and integrated communication, Introduction to Aesthetics

Work Experience

08/2025 – Present

X-Quick Software

3D Artist Intern

- Produced real-time 3D environment assets for the upcoming game *Nythe* using **Maya** (high/low-poly modeling & UVs, AI-assisted workflows), **Substance Painter** (photorealistic PBR textures) and **Unreal Engine 5** for full scene integration.
- In a small team, supported **game design**, planning, task coordination and cross-team communication, ensuring smooth handoffs and timely **demo builds**.
- Streamlined asset documentation and coordinated cross-timezone production workflow in **Notion**.

06/2022 – Present

3D & Visual Design

Independent 3D Artist

- Designed an animated opening invitation poster for **Notme** brand, creating **PBR-based** models and textures in **Maya** and **Substance Painter**, conducted **graphic design** in **Photoshop** and created **visual effects** in **After Effects**: <https://yr-f.artstation.com/projects/bg4E4d>
- Developed a **photorealistic sci-fi environment**: polygonal modeling & UVs in Maya, high-quality baking & texturing in Substance Painter, neon emissive materials and **realistic shader setup** in **Arnold**.
- Built a **UE5 real-time environment** with **blended terrain materials**, >8 foliage types and **FluidFlux water simulation**; implemented **cinematic camera sequences** for final presentation.

09/2022-06/2025

Digital Research Center, Xi'an University of Technology

Researcher

- Delivered a national-level heritage digitization project, scanning and reconstructing **100+** large-scale mausoleum sculptures with **RealityCapture**, optimize model and UV in **Maya**, deploying assets in **interactive Unreal Engine exhibitions**: <http://tangling.xaut.edu.cn/sanweisaomiao4>
- Conducted large-scale 3D scanning of immovable cultural heritage using DSLR cameras and Drone, capturing **15,877 high-resolution images** (over **700GB** of raw data) for digital preservation.
- Executed **3D Gaussian Splatting (3DGS)** restoration and built a **virtual environment** in **UE5** leveraging **Shaders**, **Post-Process Volumes** and **Blueprints**; designed 20+ UI interfaces and developed multi-level interactive exploration.

Skills & Tools

Environment Art & 3D Production

- 3D modeling, UV unwrapping and asset optimization in **Maya**
- PBR texturing in **Substance Painter**
- Unreal Engine 5** scene assembly, environment lighting, material/shader setup, **Blueprint scripting**; familiarity with **procedural/PCG workflows**
- Photogrammetry and scanning with **RealityCapture** and **3D Gaussian Splatting** techniques

Graphic Design & Motion

- Adobe Photoshop, After Effects, Premiere Pro, Audition
- Brand identity design, UI/UX prototyping

Photography & Capture

- Drone Photography, DSLR Photography

Artistic & Design Strengths

- Strong grasp of **composition, lighting and visual storytelling** for immersive environments
- Ability to translate cultural and historical elements into game environments
- Keen aesthetic judgment and attention to detail in both stylized and realistic art
