

ADNAN KHALID

SENIOR GAMEPLAY & GRAPHICS PROGRAMMER

Proficient in: Game Engines, Physics Engines, 3D Graphics, and Shaders.

Professional Summary

An experienced generalist programmer with a strong foundation in game and tools development. Skilled in leveraging linear algebra, algorithms, data structures, and computational geometry to solve complex engineering challenges. Adept at working across the full game development stack with a deep understanding of game engines and their underlying technologies.

Key Achievement

Architected and developed custom, scalable solutions for multi-million-line codebases, ensuring high performance and scalability by implementing many proven techniques including but not limited to custom dependency injection framework, modular gameplay kits and tools for the designers that followed software engineering's best practices.

Movies

2022 - 2023

Mindstorm Studios

Senior Game Developer

2020 - 2022

Geniteam Solutions

Senior Unity Game Developer

2016 - 2020

Freelance

Unity Game Developer

Projects

Revolving Games Inc

Skyborne Legacy

Working on Skyborne Legacy MMORPG

skybornelegacy.com

Worked on Core Gameplay Systems and developed custom CutScene and Multi Camera Solutions. Heavily modified Unity's Scriptable Render Pipeline to adapt the Theme of the Game.

Also worked on Dialogue Systems, Shops, Recipe Enhancements

Mindstorm Studios

Tile Garden Simulator/Solver (WIP)

Made a tool that uses Monte Carlo Algorithms to solve the levels and automatically adjusts the difficulty of the layouts which helps in Game retention. Trained an ML algorithm to predict the behavior of players which adjusts the dynamic difficulty of the game.

Mindstorm Studios

Tile Garden Match 3

Published by Lion Studios with 100K DAU and \$50K daily revenue.

Made Leaderboards and Tournament System.

Also made Leaderboard Bots with Rubber banding algorithm

Mindstorm Studios

Bubble Garden (WIP)

Using Machine Learning to generate Levels

Mindstorm Studios

Word Tiles

Woordle like game. Made the Prototype to test the retention and CPI

Mindstorm Studios

Remote Content Delivery

Worked on custom AWS server to deliver the remote content on devices

Mindstorm Studios

Analytics Tool

Made tools in python using Machine Learning that predict the Quality

of the users

Mindstorm Studios

Level Editor

Created Level Editor to help Game Designer make levels for Bubble Garden and Tile Garden

Mindstorm Studios

Project Pipeline

Used python to create AWS backend to automate deployment process

Hobby Project

Game Engine

Hobby Project

Physics Engine

Hobby Project

Rasterizer

Geniteam Solutions

Hyper Casual, Hybrid Casual

Worked on many different prototypes of Hyper Casual and Hybrid Casual games.
