ABOUT ME

An enthusiastic robotics engineering graduate from the University of Bath with a keen interest in problem solving and experience in working solo or as part of a team, coming up with innovative solutions for hardware and software related challenges. Prior to university, I took on multiple leadership roles including house leadership and sports mentoring. I also completed an extended project qualification in which I indepentandtly developed my own game, providing experience in a range of game engines and programming languages and showing initiative, creativity and commitment. Outside of my studies, I have developed organisational skills and adaptability in planning and completing a month long trip to Japan; I spent 14 years as a member of a football club, became an FA qualified referee, am now an active member of a volleyball club and enjoy playing guitar in my free time.

EDUCATION

2022 - 2025	Bachelor of Engineering: Robotic Engineering
University of Bath	Key units studied covered: AI and machine learning, power electronics, robotics design, control engineering, autonomous systems, digital communications and spacecraft systems.
