

ABDALLAH MAALIKI

GAME PROGRAMMER

WORK EXPERIENCE

Game Programmer | Stainless Games

September 2023 - October 2025

Amazon's New World | Engine and Tools (C++)

- Developed and Implemented foundational tools and features within the proprietary engine, Azoth, in C++ with the Qt, while also resolving bugs across completely different parts of the engine, from components to UI and rendering.
- Most notable work:
 - Fixing a bug in the main entity parenting system.
 - Adding new filtering classes for Entities and Components.
 - Creating a tool that maps user defined shortcuts to custom python scripts.
 - Unified entities' distance-based rendering between the engine and game.

ShockRods | Multiplayer Matchmaking and UI (UE5/C++)

- Implemented a plugin to utilize peer-to-peer matchmaking systems..
- Developed and programmed fully functional and replicated UI elements for the main menu, matchmaking, hosting, and joining, utilizing both C++ and Blueprints.

Private IP | Core Gameplay UI (Unity/C#)

- Created and programmed core gameplay UI elements, including health, weapons, and abilities, for a proprietary IP.
- Developed a low-level comprehensive UI animation system in C# for Unity UI, ensuring compatibility with various visual elements.

Gameplay Programmer (INTERNSHIP) | Sunrise Intelligence

August 2022 - January 2023

- Programmed core gameplay mechanics in a MOBA game including game "abilities" for different characters in the game.
- Created an "Energy" system, that can be used for all kinds of regenerative and consumable features in the game like Mana, health, stamina..etc.

PERSONAL PROJECTS

GRADUATION PROJECT | German Jordanian University

April 2021 - February 2022

- Developed a 3D platformer with Unreal Engine and C++, worked with all aspects of a game including programming, AI, UI, and modeling.
- Created a "Boss Fight" with different attacks and move sets.

Don't Get Fired | BRACKEY'S GAME JAM 2021

- Developed a 3d score-based game, where the player must pick and deliver papers within an office space, while avoiding people's and not getting caught.

GMTK GAME JAM 2021

- Developed a 3d puzzle platformer where players can switch between 2 characters with different abilities to solve puzzles.
