

📍 Newcastle, England

Personal Profile

I am a self-motivated organised VFX Artist capable of working under pressure. I have a clear, logical mind with a creative practical approach to problem solving and a constant drive to see tasks through to completion. I am a strong team player and work well on my own initiative. I am a reliable, trustworthy, hardworking artist that is eager to learn new skills & develop my knowledge base further and have a genuine interest in the gaming & creative industry.

Experience

COATSINK.

Senior VFX Artist

January 2023 - Present

VFX/ Technical Artist

June 2019 - December 2022

Senior VFX Artist - Battlekin

Senior VFX Artist - M.I.B Most Wanted

Senior VFX Artist - Astronimo

VFX/ Technical Artist - Jurassic world Aftermath (Part 1 & 2)

VFX Artist - Transformers Battlegrounds

- Concepting and experimenting with various vfx styles to establish the pipeline and overall look.
- Sprite creation, using Substance Designer, Embergen and Photoshop for various environmental/ character interactions.
- Working in Unity's animator/ timeline to match up some of the environmental and character vfx to the animations for cinematic scenes.
- Optimizing the vfx for better performance to work in conjunction with hardware limitations e.g. working within the Oculus Rift and Unity's own limitations.
- Using Amplify to make unique and interesting shaders for environments and abilities.
- Using Houdini to create geometry simulations which would be implemented into Unity as vertex animations.
- Using Embergen to create fire, smoke and dust simulations for realistic, stylised and cartoon sprites.
- VFX creation through popcorn FX
- Co-ordinating with the animators, programmers and designers to come up with and implement gameplay vfx.
- Mentoring and managing intermediates and juniors.

VFX/ Technical Artist

November 2018 - June 2019

VFX/ Technical Artist - Paranoia: Happiness is Mandatory

- Creating environmental and weapon VFX for the game (Unity).
- Thinking of new ideas for VFX assets to be implemented into the game.
- Creating of animated shaders for in-game 3D assets and VFX in Shader Forge.
- Rigging of non-character objects for VFX purposes.
- Optimisation of 3D assets and VFX in-game.
- Production of 3D props for the level artists.
- UVing the 3D assets.
- Level Block-out.
- Provide accurate time estimates for tasks and meet production deadlines.
- Excellent work ethic with diligence in time keeping and focused attention to detail.

Education

Abertay University
Bachelor of Arts (Hons) Computer Arts
